PROJECTS

WayFinder: Campus Navigation System 08/2026

(React.js | FastAPI | SQLite | OpenStreetMap | Tailwind CSS)

- Developed a full-stack campus navigation web application using React.js, FastAPI, and SQLite.
- Implemented interactive maps, search functionality, REST APIs, and route navigation with React Leaflet and OpenStreetMap.

Smart Face Recognition Attendance System

02/2026 – 04/2026

(Python | OpenCV | NumPy | Pandas | CSV)

- Developed an AI-based attendance system using Python and OpenCV for real-time face detection and recognition.
- Automated attendance recording and report generation using Pandas, NumPy, and CSV for efficient data management.

Healthcare Data Analysis Dashboard with Integrated Visual Reporting

11/2025 – 12/2025

(Python | Pandas | NumPy | Matplotlib | Data Analysis)

- Developed a Healthcare Data Analysis Dashboard using Python to analyze patient records and generate meaningful insights through interactive visualizations.
- Utilized Pandas, NumPy, and Matplotlib to perform data analysis and create interactive visualizations for healthcare insights.
